

RAMP GRIDIRON

MIDI

VERY STRONG RAMP GRIDIRON, CAPACITY 200 KG

Double coated ramp gridiron.

Obstacles are bridged easily with or without a wheelbarrow.

Broader than a beam or shelf (60 cm). Therefore safer.

No residue of dirt, mud, etc. This drops through the holes (specially designed grid)

Does not become slippery, even when it rains or snows.

Fits almost perfectly on all door frames, even when the door has been fitted.

On both sides a varied angle bearings so it can be placed on different obstacles, surfaces. i.e. foundations, frames, uneven scaffolding, containers and or trailers.

Double coated with primer and lacquer, is extra corrosion resistant, therefore longer life.

Powder coated in grey (no solvents, less harmful to the environment).
